Attachments: Innovating Chemical Risk Assessment_Key Messages for Paper_10.5.16_V.2.docx

I failed to include one set of key messages in the document – my apologies! Here's a revised version.

Deliberative Process / Ex. 5

Just my two cents.

For anyone who's interested, here's some info about Public Health 3.0: <https://www.healthypeople.gov/2020/tools-resources/public-health-3>

I've also attached a commentary that Karen DeSalvo, an Assistant Secretary for Health at HHS, wrote for the American Journal of Public Health about public health 3.0.

Hi Everyone:

Deliberative Process / Ex. 5

While I agree with Mary that many of these points are relevant (or even more relevant) to eco risk assessments, it may be difficult to straddle both universes seamlessly given the emotiveness of 'public health protection.'

Subject: Re: Innovations In Chemical Risk Assessment Weekly Meeting

Hi everyone. I wanted to get a head start and do my homework over the weekend, so I'll forward what I have as key messages here. They are a little boring, I'm afraid, but I'll share hoping it's a starting point for others to make more interesting. I don't have comments on the table yet, but will look at it soon.

Subject: RE: Innovations In Chemical Risk Assessment Weekly Meeting

Attached are two documents for your review:

1. The general attributes table (with an updated title to reflect a portfolio approach to risk assessment)
2. An updated (and very concise) outline for the paper (also reflecting the title change)

Action items before our next meeting (**DUE BY COB TUESDAY OCT. 4**) are:

1. Review the table and flag anything that doesn't make sense or that raises a concern
2. Send the 5 key messages that you think the paper should deliver (what are the 5 main take away messages you want someone to have after reading the paper)

Thanks,

Kacee Deener, MPH
